

FEDERICO SALGADO

BACKEND DEVELOPER

Buenos Aires, Argentina | +54 11 2724-3349 | federico.salgado2109@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

OBJECTIVE

Backend Developer with hands-on experience building and deploying production APIs in Node.js, TypeScript, and PostgreSQL. Comfortable owning a service end to end, from architecture and data modeling to authentication and CI/CD. Currently completing a Computer Engineering degree at UBA, available for hybrid roles in CABA.

DEVELOPMENT EXPERIENCE

GymTracker: Workout Tracking Platform

2026

Personal project · NestJS, Prisma, PostgreSQL, React, TypeScript, Docker, Render

- Designed a full-stack platform for planning routines and tracking workouts, with a modular NestJS architecture built to support new features without touching existing modules.
- Solved cross-domain authentication by implementing JWT in httpOnly cookies with CORS and SameSite configuration, keeping tokens off the client while running frontend and backend on separate domains.
- Modeled the PostgreSQL schema with Prisma to support workout history and personal records per user, and diagnosed and resolved a chain of production build failures to stabilize the deploy.
- Structured the codebase as one module per domain entity, each with its own controller, service, and module, keeping Prisma access consistent across the app through a shared database service.

Web Chatbot with AI Integration

2026

Personal project · Node.js, TypeScript, React, PostgreSQL, Docker, Railway

- Designed a layered backend architecture in Node.js and TypeScript, separating responsibilities by layer so the codebase can be tested and extended without rewriting existing logic.
- Modeled the PostgreSQL schema to persist multi-turn conversation history per user with referential integrity, and implemented JWT authentication with role-based authorization.
- Covered critical logic with unit and integration tests in Vitest, and built a Docker-based CI/CD pipeline on Railway that deploys on every push to catch regressions before production.

TECHNICAL SKILLS

Node.js · Express.js · NestJS · TypeScript · JavaScript (ES6+) · PostgreSQL · MySQL · Prisma · REST APIs · JWT Authentication · Docker · Docker Compose · Railway · Render · GitHub Actions · Linux · Bash · Vitest · Jest · React · Vite · Tailwind CSS · HTML5 · CSS3 · Python

EDUCATION

Computer Engineering: Universidad de Buenos Aires (UBA)

2023 – Present

Relevant coursework: Algorithms and Data Structures, Operating Systems, Computer Organization, Programming Fundamentals.

LANGUAGES

Spanish: Native English: Intermediate
